Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, 5-11, 13-23, 27-31, 35, and 36, drawn to layout modification, classified in class 715, subclass 788.
- II. Claims 24-26 and 32-34, drawn to focus control of multiple diverse work space objects, classified in class 715, subclass 767.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has a separate utility such as a control step of changing a size of each of said window display sections; invention II has a separate utility such as a plurality of operation panels each corresponding to one of said window display sections; (See MPEP § 806.05(d)).

A telephone call was made to Mr. Rossi on 03/07/05 for an oral election to the above restriction requirement. However, the telephone did not result an oral election.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search for each group is different, restriction for examination purpose as indicated is proper.
